Darren - You may want to check with Marc Edwards for data as well. I know he did a couple of rounds of testing for opportunistic pathogens in Flint. The latest was around October 15.

## Ex. 5 - Deliberative Process

On the timing of the response to the document, they would like it by COB today.

# Ex. 5 - Deliberative Process

**Ex. 5 - Deliberative Process**. The attached draft is short and I think they need a very quick turnaround (I will ask). Is it safe to say we can provide a quick review?

On a different topic, were there any plans/discussion of the task force meeting in Flint next week? Mike and I had planned a trip up there because Flint's technical advisory group was supposed to meet. That meeting has been cancelled but we felt the need to still travel up there to meet with various groups. The

Genessee County group would like to meet on Tuesday afternoon next week to go over their study.

Darren-

The attached is a really rough draft of the media release. We would appreciate feedback from the EPA task force.

Thank you for your assistance.
